The new series of W185 have an innovative design and a unique look. Each LED light: tail, direction indicator and reverse, are made of a non-transparent material. This diffuses the light so individual LEDs cannot be seen, creating a pleasant glow with a neon effect. The lens and lamp housing are made of high quality plastic, which is resistant to scratches, temperature changes and UV radiation. The lamp is E-type approved and has electromagnetic compatibility approvals as well. It is easy to mount on the vehicle.
