

# ABL BETA X3M

<b>Bulb</b>	H3 Xenon 35 W
<b>Ballast</b>	External, multi voltage 9-32 Volt
<b>Light patterns</b>	Wide flood
<b>Mounting</b>	Pedestal, pendant
<b>Lens</b>	Hardened clear glass.
<b>Reflector</b>	Highly advanced parabolic reflector
<b>Housing</b>	Fibre glass reinforced plastic
<b>Applications</b>	Tractor, agriculture, utility vehicles

ABL Beta X3M is a full beam work light built to the most stringent quality demands. It is equipped with a HID bulb (Xenon). HID Xenon delivers three times the light compared to the traditional halogen bulb, at less power consumption (35W). The service life of the bulb is about ten times compared with a halogen one (55W). Beta X3M is also more withstanding to vibration and gives a light that is more similar to daylight.

## Wide flood
